HOSELINK®

Kit Contents

1 x Wall Light
1 x Hardware Pack
2 x Screws
2 x Masonry plugs

Use this modern style solar light to gently light your outdoor space. The light turns on automatically at dusk and off at dawn, making it perfect for illuminating walkways, entrances and entertaining areas.

Activate the Light

To activate the light, unscrew the plastic base and click the button. Test the light by covering the solar panel and checking if the light comes on.

Please note: To preserve the life span of the battery, the light will dim over the course of the night in line with the batteries charge.

Product Installation

STEP 1 Find a suitable location
Solar lights need access to direct sunlight for optimum results; preferably 6-8 hours per day.

STEP 2   Install the light

Option A

Using adhesive outdoor tape.
Adhere using Hoselink Outdoor Acrylic Double-Sided Tape (SKU L100), sold seperately. Be sure to stick the tape onto the stainless-steel plate on the back of the light.

Option B

Wall or fence mount using supplied hardware pack.

B.1 Mark the holes with a marker pen.

B.2 For masonry, use a 6mm (1/4") masonry drill bit to drill the two holes. Gently hammer the plugs into place and then secure the screws tightly.

B.3 For timber, drill 3mm (1/8") pilot holes first before drilling the screws into place (plastic plugs are not required).

Specifications

Solar panel	0.5W
LED Lumens	22 lumens
Light Temperature	3000 kelvins
Lithium Battery	1200mAh / 3.7V
Charge Time	12 hours
Operating Time	6-8 hours
Size	H120mm x W90mm x D110mm
Waterproof rating	IP44
Light temperature (Kelvins)	3000K
Effective range	1-2m

NOTE: if the light does not turn on, this could be due to the battery not being charged. Leave out in direct sunlight for 6–8 hours and try again.
