

STEP 4 Lift the weed

Continue to pull the handle towards you until the weed has lifted from the ground. For large weeds, you may need to use multiple actions.

STEP 5 Eject the weed

Hold the green rubber grip on the handle and push down to open the claw and eject the weed.

WARNING: DO NOT USE EXCESSIVE FORCE.
CARE MUST BE TAKEN WHEN USING THIS PRODUCT ON LARGE WEEDS AND COMPACTED SOILS. IN THIS CASE USE MULTIPLE ACTIONS, DO NOT PULL DOWN HARD ON THE POLE AS IT CAN BREAK. UNIT HAS BEEN TESTED TO 25KG / 55LB BEARING WEIGHT. USER ERROR IS NOT COVERED BY WARRANTY.

Stand-up Weed Puller

HOSELINK®

Kit Contents

- 1 x Stand-up Weed Puller
- 2 x Long bolts
- 2 x Small screws
- 4 x Washers
- 2 x Allen keys

Pulling weeds no longer needs to be back-breaking!
This handy tool pulls weeds up straight from the ground – roots and all, helping to prevent regrowth.

Assembly Instructions

STEP 1 Prepare parts

Remove all hardware from package.

STEP 2 Black plug removal

Remove and discard black plug from the bottom section of the Weed Puller (this is there for shipping purposes only).

STEP 3 Attach handle

Push the top handle into the base of the Weed Puller.

NOTE This will only attach in one direction.

STEP 4 Secure handle

Place one washer over the long bolt and push through one side of the fixture hole. Place a washer over one small screw and insert into the other side of the bolt. Tighten with the two Allen keys simultaneously.

STEP 5 Repeat process

Repeat the process for the remaining hole. Now you're ready to get weeding!

Using the Stand-up Weed Puller

STEP 1 Place the claw

Place the claw over the centre of the weed. This is important as you want to remove the entire root.

STEP 2 Press foot down

Press down on the foot peddle until it is level with the grass.

STEP 3 Pull the weed

Remove your foot from the weed puller. Pull the handle towards you, leveraging the foot peddle onto the ground. This will close the claw around the weed.
