WI-FI GATEWAY FOR SMART HOSE
BLUETOOTH TIMERS

HOSELINK®

Use this Wi-Fi Gateway with your Hoselink Smart / Bluetooth Timers to connect them to your home Wi-Fi, so they can be controlled from anywhere using the app.

If you have purchased a Bluetooth Timer and Wi-Fi Gateway at the same time, we recommend setting up the Wi-Fi Gateway first, followed by the timer.

Download the app

If you don't already have the **Smart Life** or **Tuya Smart** app on your phone, search for **"Smart Life"** or **"Tuya Smart"** in the App Store or Google Play and download the free app. Both apps work the same way — you can use either one.

Set up the Wi-Fi Gateway

1 Use the Wi-Fi Gateway indoors and place it within range of both your home Wi-Fi modem and your outdoor timer (check your timer manual for Bluetooth range information).

2 Plug the Wi-Fi Gateway into a power socket and make sure power is on.

Pair the Wi-Fi Gateway to your network

1 Press and hold the Wi-Fi Gateway control button for **5 seconds** until the green light flashes quickly. This means the gateway is ready to pair.

2 In the app, tap **"Add Device"** or the "+" icon to add the Wi-Fi Gateway.

3 Enter your home Wi-Fi details, including the network name and password (this may autofill if your phone is already connected).

4 Wait for the gateway to connect. Once connected, you can rename the gateway if you wish.

Connect the Wi-Fi Gateway to the timer

1 In the app, open the **Wi-Fi Gateway**.

2 Press and hold the button on the timer for **5 seconds** until the LED light flashes rapidly. This means the timer is ready to connect.

3 In the app, tap **"Add Device"** to add the timer to the gateway, then select **"Add New Device"**.

4 Wait for the timer to connect. Once connected, you can rename your timer if you wish.

5 We recommend managing your timer settings through the Wi-Fi Gateway for the best experience.

Note: The Wi-Fi Gateway can connect to multiple tap timers and other compatible smart devices that work with the Smart Life or Tuya apps.
